

Eldorado 17th May

The weather didn't look brilliant but better than the weekend. 4 of us were joined by 2 members of the Albury/Wodonga Birdlife group. We went to the Wellington Mine Hole first. It was very quiet so we went to the Cocks Dredge where the very reliable Babblers showed themselves eventually. A small group of Diamond Firetails were a treat but stayed behind the twigs, frustrating the photographers. Lunch was at the park in town where the flowering shrubs attracted some honeyeaters. From there we went to part of Reid's walk and then back home via Everton Railway station.
